DESCRIPTION

Play your games to the max with the PL3331 Wireless USB Gamepad. Connect this gamepad wirelessly via the included USB mini dongle to your laptop and PC. The PL3331 Wireless USB Gamepad is equipped with 13 buttons, a directional 8-way pad and 2 analogue sticks. The trigger buttons are touch-sensitive. Additional features of the gamepad are: Powerful Force feedback, X-input and Direct-input. Enjoy hours of gaming fun!

Control your games

Enjoy the best gaming experience with the PL3331 Wireless USB Gamepad. This gamepad is ideal for racing, sports and role playing games. The PL3331 is equipped with a directional 8-way pad, 13 buttons and 2 analogue sticks for a more accurate gaming experience. The 2 trigger buttons are touch-sensitive. You can switch between the X-input and Direct-Input with the dedicated button. Additionally, the gamepad has a force-feedback function.

Enjoy wireless gaming freedom

The PL3331 Gamepad operates completely wireless. You are not forced to sit behind your desk but you can play the games from your lazy armchair or sofa. Just insert the enclosed USB mini dongle into your PC or laptop and start gaming. Enjoy the freedom of movement with a wireless range of 10m.

Rechargeable battery

The Wireless USB Gamepad has a rechargeable battery. Use the enclosed USB cable to charge the battery. The LED status indicator shows you the charging and pairing status.
