DESCRIPTION

With the EW1194 power socket it is possible to connect 5 electrical devices simultaneously. You can place the adapter in any wall socket in your home or in any other place such as offices, garages, warehouses, etc. You can enable or disable all power outlets at once with the illuminated on/off switch.
3 power sockets and 2 USB ports
The EW1194 power socket has 3 power sockets for connecting 3 electrical/electronic devices. The 2 normal USB type A ports (5V/2.4A) are suitable for charging the most modern and updated tablets/smartphones and electronic devices. The two USB Type A ports are suitable for charging smartphones and tablets with a maximum load of 2.4A at one time
Enable or disable all power outlets and USB ports with 1 switch
Use the illuminated switch to enable or disable the entire power outlet at once. This is a great feature for saving on your electricity bill and for safety purposes. The use of standby power is prevented. It is safer to disable all electrical devices at once, rather than have all devices enabled at all times.
Space saving design
The EW1194 features a space-saving design and only takes up limited wall space. All power outlets and USB ports are easily accessible. Furthermore, the 16A Schuko plug is ideal for inserting into wall sockets (Schuko sockets) present in narrow and narrow spaces!
Safe device
The power outlets and USB ports are equipped with Child Protection on each individual socket.
