• Fastening eyelets for possible installation even on the wall
• Cable: length 5.0 m
• 4 non-slip feet to ensure you do not slip or fall from the table
•

DESCRIPTION

With the EW3970-5M power socket you can connect 6 electrical devices at the same time. You can place the power strip on the floor or on the desk and the 4 non-slip feet ensure that it stays in place. You can enable or disable all power outlets at the same time with the illuminated on/off switch.
6 power outlets The EW3970-5M power socket has 6 power outlets for connecting 6 electrical/electronic devices. In the home, the number of devices that need electricity is increasing, Ewent with its EW3970-5M Power Strip offers 6 places to power, TV, Decoder, Console, HiFi Stereo, USB charger and many others. Also equipped with a special child safety lock.
Enable or disable all power outlets with 1 switch Use the illuminated switch to enable or disable the entire power outlet at the same time. This is a great feature to save on your electricity bill and for safety reasons. Prevents the use of standby power. It is safer to disable all electrical devices at the same time, rather than having all devices enabled at all times.
Space-saving design The EW3970-5M features a space-saving design and only takes up limited space on the desk. All power sockets are easily accessible. In addition, the space-saving 16A Italian plug has a 90° angle that makes it ideal for being inserted into wall sockets in narrow and tight spaces!
The power strip is equipped with fixing eyelets so that it can be fixed to the wall as well as positioned under a desk or in the living room furniture.
5-meter long cable It is equipped with a 5.0m long cable that allows it to be used even in a position distant from the power socket: this makes it ideal for charging devices or electronic equipment far from the connection socket (for example microwave ovens, refrigerators, TVs, gaming consoles, digital decoders, PCs, monitors etc). Let's think of an office where it is necessary to power multiple electronic devices, the long cable becomes very important to exploit any position even far from the wall socket!
Safe device The power sockets are equipped with overload protection. The device is equipped with Child protection on each individual power socket.

TECHNICAL

• - Outlets: 4x Type L 10/16A and 2x Type F female + Type L 10/16A
• - Switch with light: Yes
• - Input: AC 110-230V-50-60Hz
• - Protection: Children, Overcurrent and Overtemperature
• - Cable: H05VV-F 3G 1.0 mm2 - 5.0 mt.
• - Plug connector: space-saving Italian 16A (L Type)
• - Max voltage: 250V/3500W
• - Dimensions: 300x130x55mm
• - Weight: 320 gr
• - Color: White
• - Material: Plastic
