• On/Off switch
•
•

DESCRIPTION

Improved posture and typing Type more naturally thanks to the curved and split keyboard design. The angled shape reduces muscle strain on the wrists and forearms.
Ergonomic Wrist Rest The memory foam wrist rest provides comfort, offering 54% more wrist support and reducing wrist flexion by 25% compared to a standard keyboard without wrist support.
Improved posture and reduced muscle tension The wrists remain in a natural and comfortable position thanks to the feet that can be adjusted to 0°, -4°, and -7° for optimal ergonomic positioning.
Low-profile and concave keys for fast and comfortable typing.The wireless keyboard allows for fast typing speeds as the concave, low-profile keys fit the shape of your fingers. The concave key shape enables a more comfortable key press. The back of the keyboard is equipped with anti-slip pads to keep the keyboard stable.
Wireless and Bluetooth Multi-device Keyboard The Ewent EW3288 wireless keyboard features Bluetooth and 2.4G wireless technology. You can connect up to three devices simultaneously and switch between them by pressing the dedicated key. The keyboard is compatible with Windows PCs, laptops, and Android devices.
Silent Keys, Dedicated Windows Keys The Ewent keyboard is compatible with Windows and Android systems and features the standard control keys for the operating system (Windows Key). Customize the use of the Fn key and enjoy silent keys, status mode indicators, on/off, and Caps Lock.
Full-size Design The material used for the Ewent wireless keyboard is high-density polycarbonate to enhance its durability. The large size of the keyboard gives your fingers ample space for easier typing. Quick keys like Play, Pause, and Volume allow you to stay focused without having to open other programs or settings just to make adjustments.
Wide Compatibility The Ewent keyboard is compatible with Bluetooth devices running Windows 8/10/11 or later and Android 4.3 or later.
