Standard PPS Technology
The 30W USB-C + QC3.0 Charger features PPS (Programmable Power Supply), an advanced charging technology standard for USB-C devices. It can modify voltage and current in real time by providing maximum power based on the device's charging status. The main advantage of PPS over other standards is its capability to reduce conversion loss during charging, which means less heat is generated and therefore extends the device battery's lifespan.
This model supports updated PPS2 mode: 3.3-11.0V ⍰ 2.0A 20.0W Max.
