DESCRIPTION

Plug and Play

The EW3305 is an optical mouse with 2 buttons and a scroll wheel. The resolution is 1200dpi. It is 100% plug and play, so no software or drivers are required. The 1200dpi optical sensor allows for precise control on any surface.

Optical Precision and Scrolling

Simply connect it to the USB port and enjoy the mouse's ease of use and precision. The 1200 dpi optical sensor will further assist you in using the mouse. Equipped with two buttons and a scroll wheel, the mouse supports all the most common functions.

Ideal for Home and Office

It is compatible with the vast majority of surfaces and operating systems. The ergonomic grip makes it ideal for extended use, especially at home and in the office, and for any other use, thanks also to the longer cable than other mice in its category. In fact, the EW3305 has a 1.5 m cable, compared to standard mice that typically have a length of 1.2m

Compact size

The mini, ultra-compact design makes the EW3305 the ideal companion for those always on the go: it easily fits in a bag or backpack and is ready for use in any situation.

Cable with integrated dual USB-A and USB Type-C connectors

Integrated dual USB connectors (USB-A and USB Type-C) for direct connection to PCs, notebooks, and other devices without additional adapters.

It comes with a special USB-C/A adapter cable that allows the mouse to be used with both older devices (via the USB-A connection) and newer and more modern ones (via the Type-C connector) without having to purchase additional adapters, all conveniently in a single mouse!

Wide compatibility

It pairs with any netbook or notebook. Thanks to the dual Type-C and USB-A connections, the EW3301 mouse is compatible with major operating systems (Windows, Android, Mac, Linux) and various devices, including desktop PCs or laptops with a USB-A connection and modern notebooks (including MacBooks) via the Type-C connector.
