DESCRIPTION

The 19" 1U Cable Management Panel with 5 Metal Rings is designed to provide efficient and organized cable management within standard 19" racks and cabinets.
Equipped with five robust metal rings with a height of 65 mm, it enables the orderly routing and separation of network, telecommunications, power, and security cables, helping maintain a clean and professional rack installation.
Manufactured from high-quality steel and finished with a durable RAL 9005 black powder coating, the panel offers excellent strength, durability, and long-term reliability in professional networking and IT environments.
Using a cable management panel simplifies installation and maintenance procedures, improves access to installed equipment, and reduces the risk of excessive cable bending, stress, or tangling.
Occupying only 1U of rack space, it provides a practical and cost-effective solution for optimizing cable organization in wall mount cabinets, floor-standing racks, and server enclosures.
Ideal for data networks, telecommunications, CCTV systems, and structured cabling installations, the 19" 1U Cable Management Panel is an essential accessory for maintaining a professional and well-organized rack environment.
