EP1981

19" Rack Cooling System with 2 Fans

- Cooling system for 19" rack cabinets
- Equipped with 2 cooling fans
- Designed for active ventilation and heat dissipation
- Helps maintain optimal operating temperatures
- Improves airflow inside rack cabinets
- Helps prevent heat accumulation
- Ideal for networking, telecommunications, CCTV and IT equipment
- Compatible with standard 19" racks and cabinets

DESCRIPTION

The 19" Rack Cooling System with 2 Fans is designed to provide efficient active ventilation for professional rack cabinets and server enclosures.
Equipped with two cooling fans, the system promotes air circulation inside the cabinet, helping dissipate heat generated by network switches, routers, servers, DVRs, NVRs and other electronic equipment.
By ensuring continuous airflow, the cooling system helps prevent excessive heat accumulation, contributing to equipment reliability, stable operation and longer operating life.
Designed specifically for 19" rack installations, it provides an effective thermal management solution for networking infrastructure, telecommunications systems, CCTV installations and professional IT environments.
The 19" Rack Cooling System with 2 Fans is an essential accessory for maintaining suitable operating temperatures and ensuring reliable performance of rack-mounted equipment.

TECHNICAL

- General
- Product Type: Rack Cooling System
- Rack Standard: 19"
- Number of Fans: 2
- Cooling Type: Active Ventilation
- Installation Type: Rack Mount
- Package Contents
- 19" Rack Cooling System
